Covictory Garden Write up 1

I have decided to take part in the Covictory Garden assignment and wanted to experiment with different living situations. My parents are split and both have very opposite living situations that can relate to people during the first and second world war. My father lives in the country with a lot of land and my mother lives in a small town house without a backyard.

Today, May 16, my father and I went out to buy some plants for our garden. We bought Tomatoes, Broccoli, Zucchini, Beans, Peppers, and Celery as we do every year. We were planning to begin preparing and planting the garden this weekend, however the weather wasn't on our side and it rained the whole time I was there. Our garden is around 20ft by 10ft which is rather large.
