

Going Down the Rabbit Hole

This activity asks you to start with a location, object, image or other thing provided by the teacher and see what you can learn, and where that “learning journey” will take you. Remember to ask lots of questions, and don’t shy away from following all the tangents that will present themselves along the way. Some key questions:

How does this relate to what we have learned in the course so far?

What is the “method to the madness” of being given this location/object/image/thing?

It is important that you **fact check** the information that you do find as you prepare a brief presentation to be given to the rest of the class.
